

BLACK WOMEN IN SCIENCE NETWORK

WHAT'S NEW?

As we approach the final quarter of the year of the year, it's only right that we start to get reflective. Since June there have been a lot of changes in the world, join us as we navigate through what these changes look like for the network.

LET'S TALK...

Through hashtags such as #BlackInTheIvory and #RepresentationMatters it is clear that the black experience in STEM can be improved. Long-term changes in STEM are something that we desperately need. Our interactive blog post explores solutions to an equal STEM experience.

SAFE SPACE

Our [members' forum](#) is a much-needed safe space for black women in science to connect with each other openly. Head over to start a conversation and engage with our inspiring members.

KEEP AN EYE ON

"TCIM follows my journey as an aspiring scientist alongside amazing contributors across the field. TCIM is a life science careers blog that aims to show there isn't one way to science. People should follow for inspiration, motivation and a safe space to connect with like minded people. The idea is to get anyone regardless of background thinking about their careers early."

WHAT'S NEXT?

For Black History Month this year we will be focusing on the theme of 'Community'. We will cover what community means to us and why it should be important to us all. We will also be having takeovers on our Twitter.

Stay tuned!
