

# BLACK WOMEN IN SCIENCE NETWORK

## WHAT'S NEW?

*Welcome to our second newsletter of the year. In the past 3 months, we have had 2 blogs posts, a thread on ways to support the Black Lives Matter Movement and we've teased (sorry!) our very much anticipated Networking Online series which will be coming soon.*

## PHDS AND MOVIES

*Ever thought about doing a PhD? Our followers answered about some of the highs and lows of a PhD. We also dive into the science of 3D films as the movie industry is booming during the COVID-19 lockdown that many of us are experiencing. Head over to our blog for more...*

## SHARE YOUR WORK

*We know that #RepresentationMatters. This counts also in terms of publication. We know there needs to be a platform for Black researchers to highlight their work. If you have research papers that you would like to signpost, head over to our Members' Forum and add to our thread.*

## KEEP AN EYE ON

*The Black Lives Matter movement has been picking up traction and making headlines in response to the tragic loss of George Floyd, Belly Mujinga and Breonna Taylor (no name a few). For a long time, black lives have not been valued or regarded equal to their peers. Enough is enough. We want to make sure that we're using our platform to shed light on the change that needs to happen. Justice must be served. We have created threads of various mwaysy that people can contribute to the movement over on our social media platforms.*

## WHAT'S NEXT?

*Stay tuned for our very requested blog series called Networking Onlien going over our 4-step guide on how to make successful, meaningful connectins online. If you have something you'd like us to do, let us know!*
